

THE STATA JOURNAL

Articles and Columns	1
Announcement of the Stata Journal Editors' Prize 2022	1
Simulating time-to-event data from parametric distributions, custom distributions, competing-risks models, and general multistate models M. J. Crowther	3
A toolbox for measuring heterogeneity and efficiency using zonotopes	25
..... M. Cococcioni, M. Grazzi, L. Li, and F. Ponchio	
Interpreting logit models	60
..... L. J. Uberti	
Computing the fragility index for randomized trials and meta-analyses using Stata	77
..... A. Linden	
Travel distance and travel time using Stata: New features and major improvements in georoute	89
..... S. Weber, M. Péclat, and A. Warren	
Measuring technical efficiency and total factor productivity change with undesirable outputs in Stata	103
..... D. Wang, K. Du, and N. Zhang	
Binary contrasts for unordered polytomous regressors	125
..... J. Freese and S. Johfre	
Effect sizes for contrasts of estimated marginal effects	134
..... B. P. Shaw	
Analyzing coarsened categorical data with or without probabilistic information .	
..... W. Vach, C. Alder, and S. Pichler	158
Fitting mixture models for feeling and uncertainty for rating data analysis	
..... G. Cerulli, R. Simone, F. Di Iorio, D. Piccolo, and C. F. Baum	195
Notes and Comments	224
Stata tip 145: Numbering weeks within months	224
..... N. J. Cox	
Erratum: A comprehensive set of postestimation measures to enrich interrupted time-series analysis	231
..... A. Linden	
Erratum: Unit-root tests for explosive behavior	234
..... C. F. Baum and J. Otero	
Software Updates	238
